

Junior Data Scientist

MailUp, a listed digital company, specialized in advanced marketing technologies solutions, is currently looking for a brilliant new graduate as **Junior Data Scientist**, who will be included in the **Business Intelligence Team**, reporting directly to the **Business Intelligence Manager**.

Your Impact

The resource will be inserted in a fast-growing and highly stimulating context, where it will be able to increase its skills both through on-the-field learning and specific training.

In particular, within projects and in collaboration with the team, it will perform the following activities:

- You will deal with the development of continuous services for our company (scoring / clustering), using both statistical and IT knowledge, with the aim of identifying and creating analytical models that are strategic for the company;
- You will analyse our customers data to help them in the email marketing activity;
- You will make predictive models to anticipate the actions of our customers.

What are we looking for

- Degree in Statistics, Mathematics or Physics;
- Utilize open source analysis tools such as R or Python to analyze digital services data.
- Strong analytical thinking and passion for Data;
- Ability to get into the details, while also seeing and understanding the big picture;
- Proficiency in Italian and intermediate knowledge of English;
- Attitude to continuous updating (Report in the CV some sites / blogs / update sources details!);
- Familiarity with SQL is desirable

What it's like working at MailUp:

- Opportunities for professional development
- Specialized training
- FlexiLife

Location:

Milan
